

Fleet Management

PORTAL

Powerful Fleet Management Tool

With today's high cost of operating a vessel, it is imperative that owners and operators proactively manage their vessels during the voyage. With PORTAL, AWT's powerful fleet management tool, you can quickly monitor your fleet and ensure they are operating efficiently and safely. PORTAL is a web-based application that is easy to use, is password protected for your security, and provides all the information you need to quickly assess your vessels' status. PORTAL can be accessed 24/7 from any computer with an Internet connection via <http://www.awtworldwide.com/login.asp>.

Ensure Efficient and Safe Vessel Operation

PORTAL features:

- Voyage alerts allow immediate focus on vessels with issues, such as:
 - Heavy weather
 - Off track
 - Speed under performance
 - Time loss to date and estimated for entire voyage
 - Large changes in ETA
- World map fleet display highlighting vessels with alerts
 - Vessel display
 - View vessel's route with weather overlay; scroll back or forward in time
 - View message traffic between vessel and AWT
 - Preliminary performance evaluation
 - Detailed fuel consumption analysis

“AWT assisted in a safer, more efficient fleet operation while also taking a large step toward protecting the environment by reducing en route fuel costs and avoiding TEU losses at sea.”

– Ship Manager

www.awtworldwide.com

- World map with satellite-position polled vessels
 - List of most recent polls with speed, heading, distance and weather
 - Map displaying polls
- Optional interactive satellite polling service
 - Track vessel's projected ETA compared to scheduled ETA
 - Email alerts when vessel will arrive behind schedule
- Comprehensive 16-day forecast
- Interactive tropical storm filter displaying forecast and which of your vessels might be impacted
- Access to weather reports from WMO reporting vessels
- Capability to customize displayed parameters and alert thresholds
- Order services

PORTAL benefits:

- Easier monitoring of your fleet's progress
- Convenient access via any computer with Internet connection
- Secure data
- 24/7 access
- No software or data to download
- Real-time data from the AWT production database (no delays)
- Customized alerts allow immediate focus on vessels with potential problems
- Comprehensive voyage details
- Preliminary performance evaluations
- Historical performance reports
